Composizione di poliedri regolari - *Universalis Harmonia*
Azienda Castiglioni Legnami - Bregnano (Como)

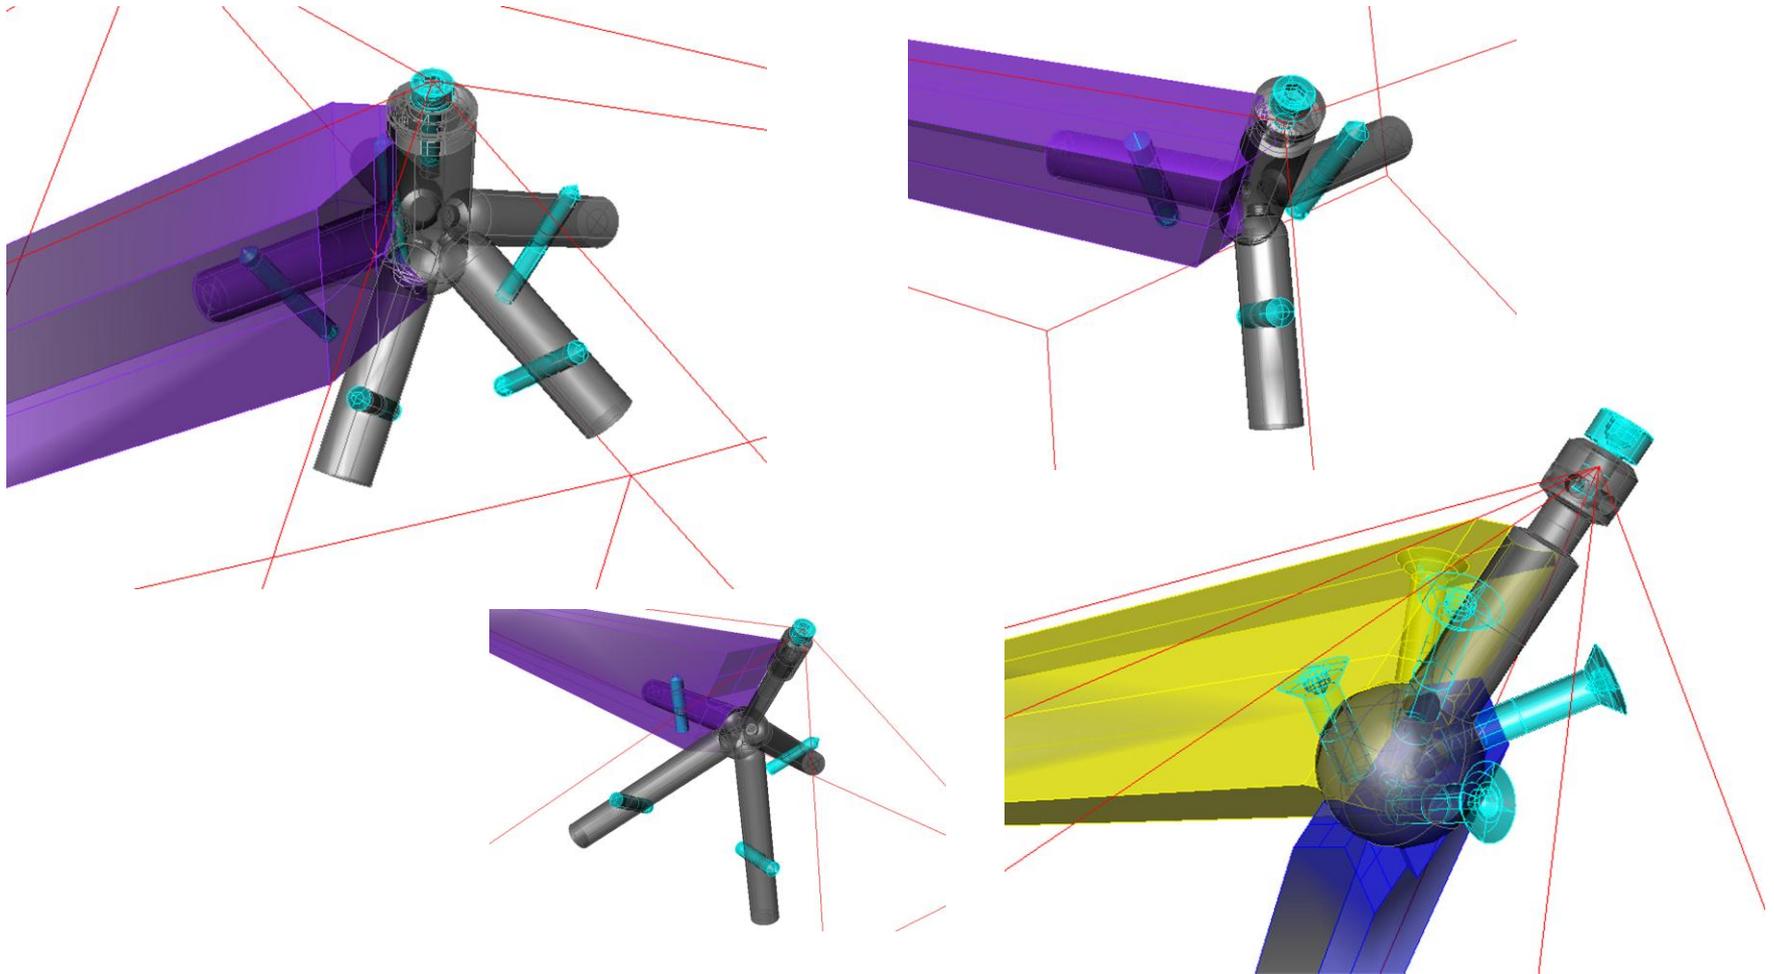

Platone, Euclide, Pacioli, Leonardo, Keplero, Eulero, Hamilton,
Gergonne, Ponchelet, Terragni, Bukmister Fuller, Coxeter.
Sezione Aurea, Dualità, Concetti Assoluti.

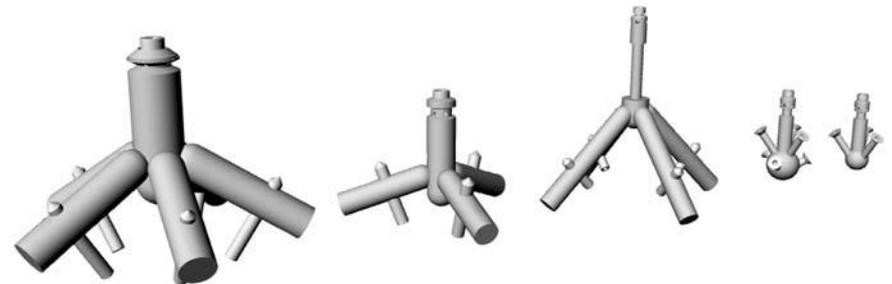

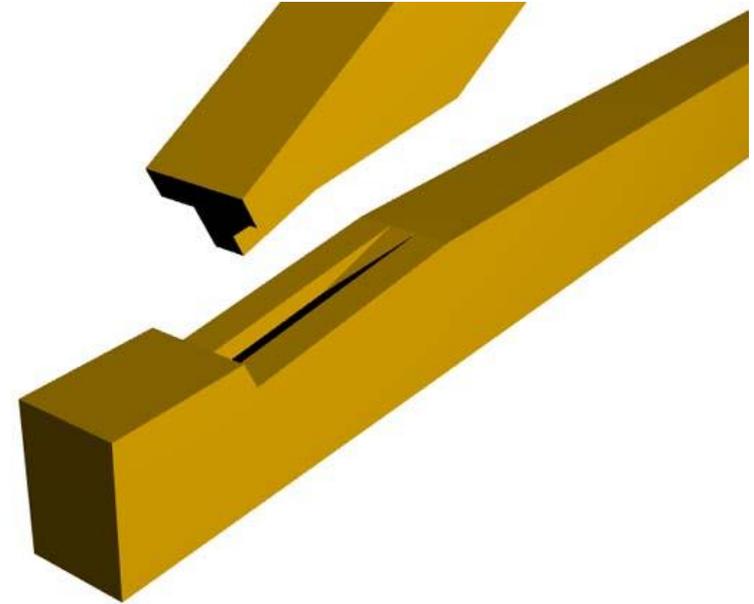

Il senso di questo progetto è quello di estrapolare la semplicità da ciò che si presenta confuso e complesso

I giunti sono pensati per ridurre le concentrazioni di sforzo, dunque per ottenere strutture più agili, leggere, robuste, in definitiva più belle ed eleganti.

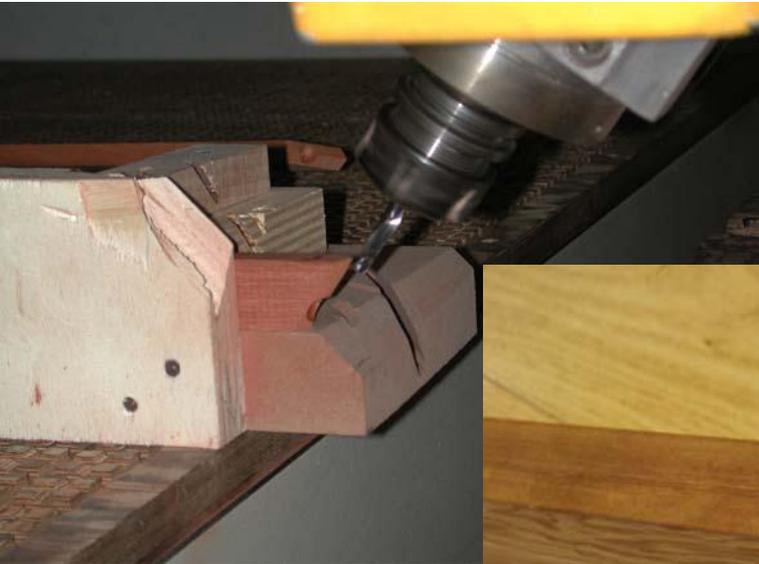

Parti interiori, dove si decide dell'apparenza esteriore

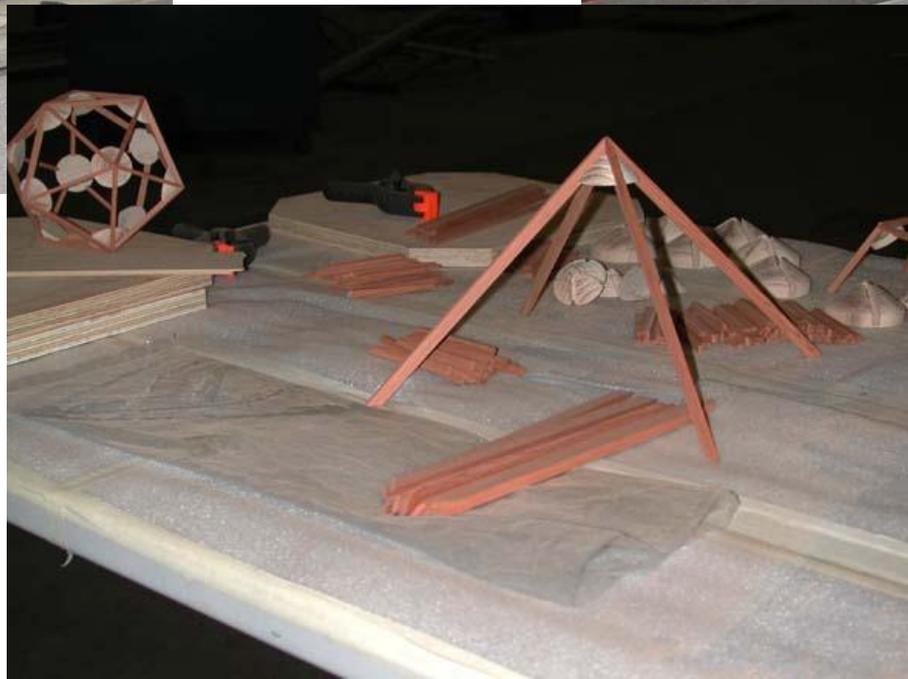

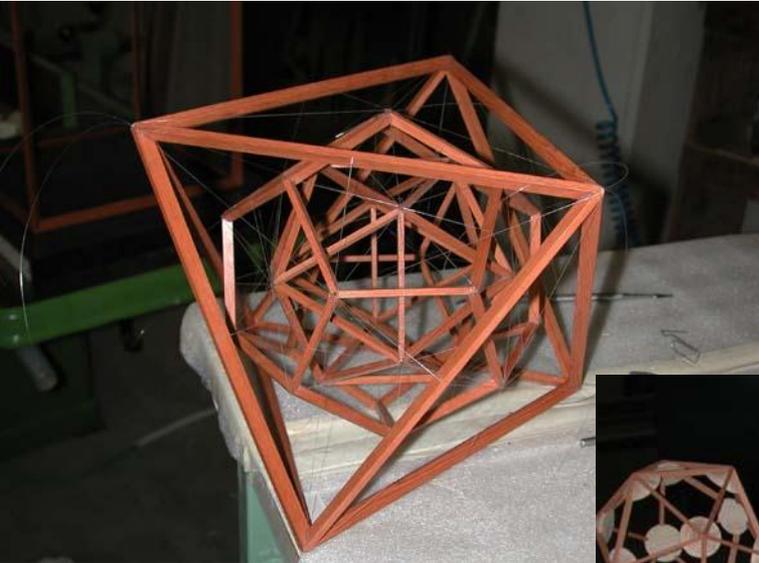

Cinque giunti in cerca di sede

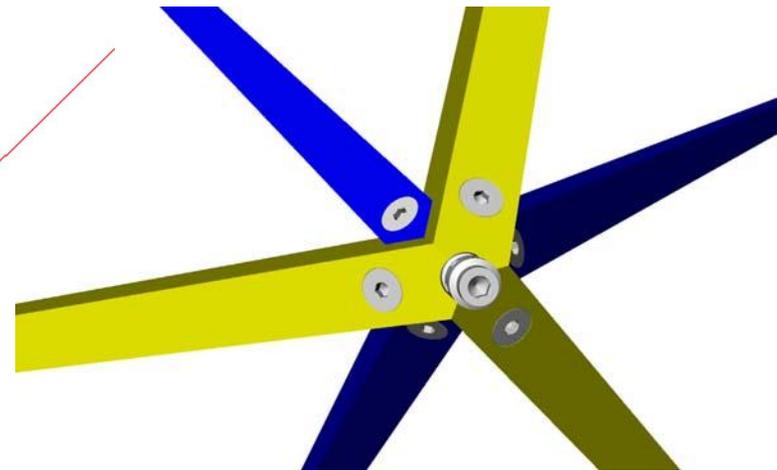

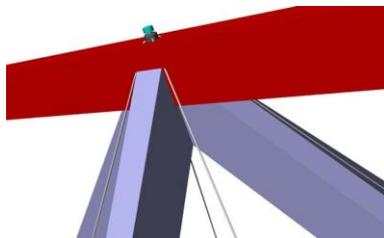

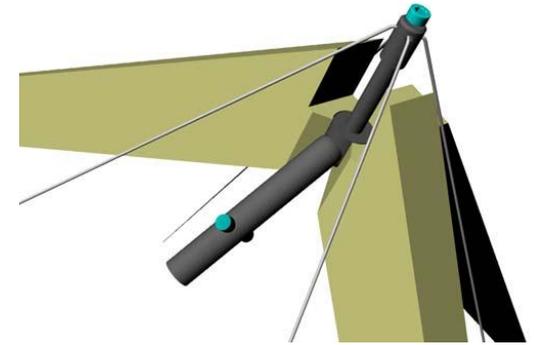

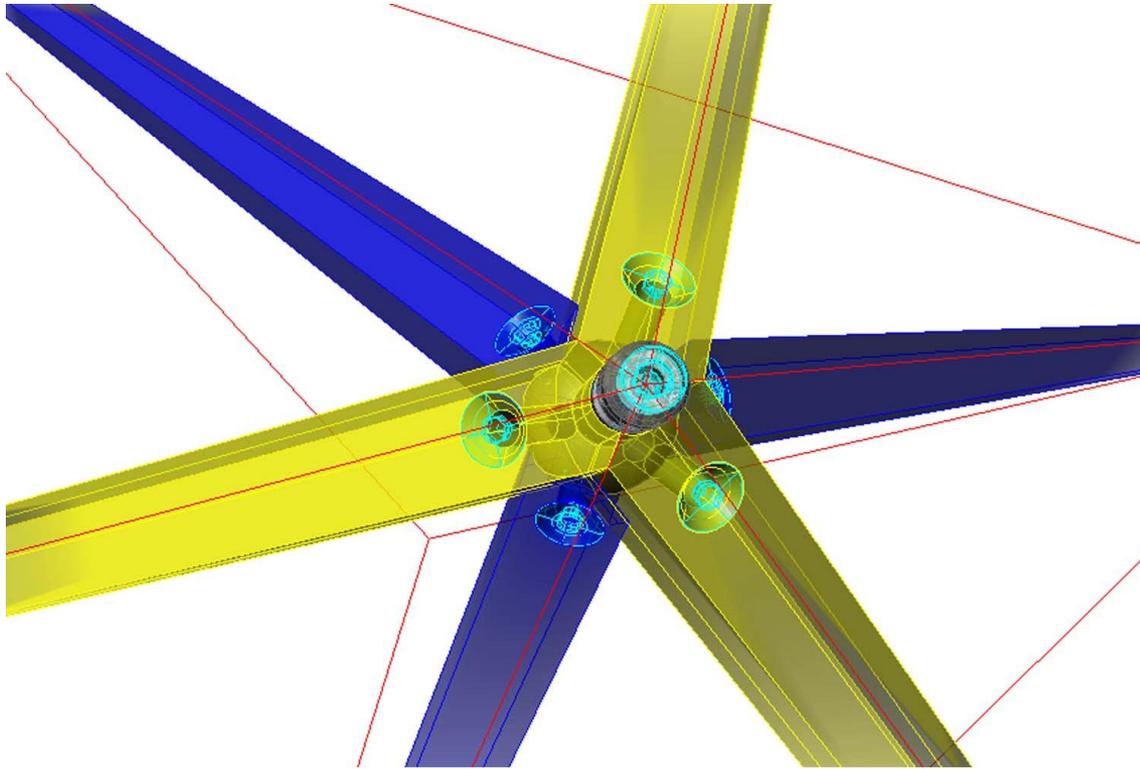

Perfezione, efficacia, stabilità, rapidità, semplicità costruttiva sono imperativi legati alla pratica di alte tecnologie

Strategia di un piccolo “cantiere” convenzionale

Sinfonia di un rapporto tra legno (di alerce), acciaio e geometria

Sabato, 26 giugno 2004, ore 11
